

Dear FCC,I urge you to reject the NAB's petition 04-160. Please don't allow the NAB to take away our right as customer to have services that we "pay" for like you do with Satellite TV. If the local stations choose not to upgrade their equipment and provide consumers with services of this time (It is 2004!!!). It's just like the local TV stations, they want you to purchase roof antennas instead of allowing me to spend \$1 mo. for the national channel because of the local advertisement. But, the truth is that I can't recieve the channels clear, and I refuse to pay \$200 to get an antenna, so I don't watch their channel!!! All because the local station won't spend money to add range. The fact is that the satellite companies, both radio & tv spend it for consumer so that we buy their service. And in this country, the companies that offer the best are going to sell the best. XM provides one of the best services in the US, and I support them. So please protect their right to provide good ser!

vice!!!

Sincerely,
Jesse J. Carattini
